We examined recent amphibian and reptile specimens and photos deposited in the amphibian and reptile collection of the Bell Museum of Natural History (JFBM) and provide a list of new amphibian and reptile county records in Minnesota (Moriarty 1996; Oldfield and Moriarty 1994). The majority of new records were due to collecting efforts related to the Minnesota Dept. of Natural Resources' Minnesota County Biological Survey. Andrew M. Simons verified all specimens and photos. JFBM specimen numbers preceded by a "P" are cataloged in the photo collection. Nomenclature follows Crother (2000) except where noted.
